Powerful Results

2007 AWARDS

It’s reassuring to know that award-winning care is available right here at Broward Health. Here are just a few of the recognitions we received last year.

Joint Commission
National 2007 Ernest Amory Codman Award
Pediatric Sedation Unit
Chris Evert Children’s Hospital/Broward General Medical Center

Broward County Coalition to End Homelessness
Homeless Advocate of the Year
Scott Dinnar, Director of Quality/Clinic Operations
Community Health Services

Florida Hospital Association’s 2007 Hospital Hero of the Year Award
Adriana Karanovic, RN
Broward General Medical Center

Association of Professionals in Infection Control and Epidemiology
2007 Hero of Infection Prevention
Ava Dobin, Epidemiologist
Coral Springs Medical Center

Nursing Spectrum/Florida Region Management Excellence Award 2007
Marcia Davis, RN, MSN, ARNP, CMMSN
North Broward Medical Center

Associated Home Health Industries of Florida
2007 Florida Home Care Hero
Gail Troy-Zakaroff, LPN
Gold Coast Home Health Services

Deacrtified Clinical Services
Clinical Excellence Award
Center for Wound Care & Hyperbaric Medicine
Imperial Point Medical Center

Florida’s Voice on Developmental Disabilities
2007 Advocate of Distinction
Dr. Susan Widmayer
Children’s Diagnostic & Treatment Center

Our new name heralds a powerful new vision for healthcare in Broward County. Fully integrated, innovative. And compassionate. We have some of the most modern facilities anywhere and we’re only going to get better. The new Broward Health. A powerful new way forward. A powerful new way to provide exceptional healthcare for all of Broward County.

Putting Broward’s Health First

Whether or not you’ve had a personal experience with us, it’s important for you to know the success that Broward Health, your community health system, continues to achieve as well as the measures we take to ensure that we are always accountable. You may have heard that we changed our name to Broward Health to better reflect all that we do to improve the health of the people of Broward County. Our aim with this 2007 Report to the Community is to provide you with insight into the inner workings of the Broward Health family. Our actions are guided by careful consideration of the health and welfare of the entire community we serve, balanced with the financial health of our community.

We are one of the top five largest public health systems in the nation with more than 30 integrated healthcare facilities, a team of nearly 2,000 physicians and 8,000 professionals dedicated to providing world class healthcare to our community. Recently, Broward Health was ranked among the most highly integrated healthcare systems in the nation and the highest in Florida – by Verispan, a leading provider of health data and information products.

Significant measures have also led to a stronger financial position for Broward Health. In fact, our improved financial performance has led to higher bond ratings for the second year in a row by Moody’s and Standard & Poor’s. For the fourth consecutive year, our initiatives to improve operating efficiencies have led to a reduction in the ad valorem taxes used to help us provide medical care to the uninsured of our community.

Last year, we provided charity care for 34,897 patients in our hospitals, emergency rooms and community health centers. And our millage rate for 2007 was the lowest in 25 years.

We have done all of this while continuing to improve the quality of care and advancing our capabilities. It’s part of our strategy to become more competitive and differentiate ourselves as the first system in the region to offer the best technology and we are building new Emergency Departments at Imperial Point Medical Center and Coral Springs Medical Center.

New technologies in the diagnosis and treatment of cancer soon will be available at the Comprehensive Cancer Centers at Broward General Medical Center and North Broward Medical Center. The first edition is image guided radiation therapy systems at both hospitals, providing more precise radiation therapy treatment than conventional linear accelerators. Next will be the CyberKnife Robotic Radiosurgery System. The first of its kind in Broward, the CyberKnife provides real time imaging guidance and provides highly specialized treatment for cranial tumors. Rounding out Broward Health world-class technology will be Proton Beam Therapy, the first in South Florida.

But our focus is not only on technology. The implementation of a best practice compliance program is helping to ensure only the highest levels of integrity guide our decisions and clinical practices. And there are more accomplishments to be proud of. Our pediatric simulation unit this year received the highest prize, the Codman Award, from The Joint Commission, the nation’s oldest and largest standards-setting and accrediting body in health care. In addition, the National Football League chose us as one of only 14 hospitals in the nation to partner with them for joint replacement procedures for NFL alumni.

We have invested $15 million in information technology that will result in improved patient safety for dispensing medications and confidentiality of patient information. With the addition of two new medical office buildings on our campuses at Imperial Point Medical Center and North Broward Medical Center, we will be able to provide the community we serve with better and easier access to care.

A world class health system is not built solely on advances in technology and bricks and mortar. At the core of our success is our team of nationally-recognized medical experts and the highest level of care delivered to patients in the entire community. That's the Broward Health difference. That's powerful medicine.

ACCOUNTABLE TO BROWARD

It’s no coincidence that for the past four years as Broward Health* reduces the tax rate paid to support the system, we’ve made tremendous strides in our ability to provide world class healthcare.

The two welcomed trends actually go hand-in-hand. As Broward County’s tax-assisted multiple hospital system is committed to providing the highest level of healthcare at the most reasonable cost. Being competitive in the industry not only drives our fiscal responsibility but it also fuels our ability to earn business. This, in turn, reduces our reliance on taxes to fulfill an important part of our mission, which is to serve as a safety net for those members of our community who would otherwise not have access to care.

In fiscal year 2007, our uncompensated costs to provide care and community services were $267 million. Of that amount, taxpayer funds covered 96 percent. Broward Health-generated income covered the balance of $10 million.

The 2007 tax rate of $1.6255 per $1,000 of taxable property value was the lowest since 1982. Overall, Broward Health received $7 million less in tax funds in 2007 than 2006, when the millage rate was 1.8317. Meanwhile, we bucked the trend of bond rating downgrades that most hospitals are receiving. Instead, our improved financial performance has led to two consecutive bond rating upgrades by Moody’s and Standard & Poor’s.

While this is all good news, we continue to face challenges including a physician shortage, with nearly half the practicing physicians in Florida over the age of 55. Reimbursement for managed care and other payers is decreasing, and the uninsured population is increasing. And more recently, due to the decline in the housing market, we are seeing some stagnation in our volumes. Faced with this reality, we remain focused on our strategy of reducing our cost structure, increasing competitiveness and building the brand that is Broward Health. We continue to reinvest our revenues in technological advances, medical staff education, community health and wellness programs, as well as facility upgrades.

Broward Health is the new name for the North Broward Hospital District. However, the North Broward Hospital District remains as the legal name for such things as tax millage notices and Board of Commissioners action.

BROWARD HEALTH EMBARKS ON QUALITY INITIATIVE

Demonstrating our commitment to the health of Broward County, we are implementing one of the most ambitious quality improvement initiatives in the industry.

The strategy is to improve and develop internal measures to improve patient outcomes among the most common and highest risk cases.

“We will better identify who we are treating, what their diagnosis is and what services we offer to treat these patients. Then we will make improvements to provide the best of the best care,” said Lisa Rawlins, Director of Quality and Process Improvement, who is leading the initiative.

Broward Health will measure progress using two of the top national medical rating systems in the industry as well as the top benchmark at the state level. The goal is to achieve a top 10 rating from all three evaluation systems.

For 26 months, Mick Parra suffered constant pain from wounds on both legs that would not heal. Physicians at a hospital where he endured more than two years of treatment could not cure him. Finally Parra found relief at Broward Health’s Center for Wound Care and Hyperbaric Medicine at Imperial Point Medical Center. “Upon my arrival at the Wound Care Center I met with their director at the time, James Wilcox. He reviewed my case history and we spoke about all of the aspects of the pain I had been experiencing. Mr. Wilcox’s conclusion was that he could cure me in a few weeks – and he was right on target with his prediction. ... I can truly say the Wound Care Center at Imperial Point has made a tremendous difference in my quality of life.” — Milton “Mick” Parra, Davie

BROWARD HEALTH ORTHOPEDICS: WE CAN’T WAIT TO MAKE YOU BETTER

Even if for you an injury or chronic joint disease doesn’t mean your livelihood is at stake, Broward Health’s orthopedic physicians will treat you like it does. Whether you’re a recreational sports player, senior citizen or high school athlete, if you come to Broward Health, you’ll receive care from some of the best orthopedic physicians in the field – including the physicians who treat the Florida Marlins and Miami Dolphins.

Our team of nationally and internationally recognized orthopedic physicians will have you doing the things you love again as quickly and painlessly as possible. We offer the most extensive range of the latest technology and more treatment options for joint replacement or repair than any other facility in the region.

• Broward Health orthopedic physicians performed 702 joint replacement procedures on Broward County residents last year – more than any other hospital or hospital system in Broward County.

• We are one of only two South Florida healthcare facilities to offer computer-assisted, minimally-invasive total hip and knee replacement surgery.

• We were selected as one of only 14 leading medical centers across the country – and the only one in Florida – to provide joint replacement surgery for retired NFL players.

• We are the official sports medicine provider for all BCAA (Broward County Athletic Association) sponsored events. We have 25 athletic trainers in 20 Broward high schools and Broward Health physicians are on the field for many of the county’s football games.

BROWARD HEALTH: A HEART CENTER OF EXCELLENCE

Within Broward Health’s state-of-the-art facilities, nationally and internationally renowned heart specialists and surgeons provide expertise and compassion throughout the entire continuum of cardiac care. Services include diagnosis, urgent care, minimally invasive surgeries, out-patient care, preventive medicine, wellness and rehabilitation.

While outstanding cardiac care is available across Broward Health, the 115,000-square-foot Heart Center of Excellence is dedicated to providing comprehensive clinical, surgical and rehabilitative care under one roof. The center provides the most sophisticated and advanced technology, along with the newest, least-invasive cardiac surgical techniques to the South Florida community with the goal of speeding patient recovery time and dramatically reducing the rate of complications.

BROWARD HEALTH: HOPE FOR NON-HEALING WOUNDS

Chronic wounds caused by diabetes, circulatory problems, and other conditions can radically reduce a patient’s ability to enjoy life. Broward Health’s team of medical experts with advanced training in wound care offer the latest treatments including hyperbaric medicine at Imperial Point and Coral Springs medical centers. Specialized treatments look at the underlying causes of the wound and offer plans specifically tailored to accelerate the healing process.

In fact, the Center for Wound Care and Hyperbaric Medicine at Imperial Imperial Point Medical Center has been awarded “accreditation with distinction” for its quality patient care and outcomes. It is the only wound care center in Florida with this status. North Broward Medical Center’s wound care program uses a multi-specialty approach to maximize healing in the shortest time frame. Treatments may include physical therapy, radiation, pain management and nuclear medicine.

For 26 months, Mick Parra suffered constant pain from wounds on both legs that would not heal. Physicians at a hospital where he endured more than two years of treatment could not cure him.

Finally Parra found relief at Broward Health’s Center for Wound Care and Hyperbaric Medicine at Imperial Point Medical Center.

“Upon my arrival at the Wound Care Center I met with their director at the time, James Wilcox. He reviewed my case history and we spoke about all of the aspects of the pain I had been experiencing. Mr. Wilcox’s conclusion was that he could cure me in a few weeks – and he was right on target with his prediction. ... I can truly say the Wound Care Center at Imperial Point has made a tremendous difference in my quality of life.” — Milton “Mick” Parra, Davie
BROWARD HEALTH: LEADING THE FIGHT AGAINST CANCER

Broward Health's cancer programs offer a full spectrum of services for adult and pediatric cancer patients in Broward County. The Comprehensive Cancer Centers at both Broward General Medical Center and North Broward Medical Center hold the prestigious cancer program approval by the American College of Surgeons Commission on Cancer – an accreditation which only one out of four cancer centers hold. Our affiliation with H. Lee Moffitt Cancer Center & Research Institute offers further assurance to patients that they are receiving the best possible care.

Now more than ever, we are making significant investments in cutting-edge technologies that will aid in the diagnosis and treatment of cancer.

INVESTING IN TECHNOLOGY

Broward Health will be home to the only CyberKnife Robotic Radiosurgery System in the county. The CyberKnife provides real time image guidance and provides highly specialized treatment for cranial tumors.

Coming to Broward Health in 2010, the Proton Beam Therapy System is the safest and most advanced form of radiation treatment for many specialized types of cancers. It’s especially ideal for pediatric cases. Historically, because of its high cost, Proton Beam Therapy has only been available in four locations in the United States. Now, as a result of recent developments, Broward Health will be able to obtain the system at a cost less than one-fifth of the traditional price.

CHARTERED FOUNDATION HELPS ENSURE BROWARD HEALTH’S FUTURE

As a public not-for-profit hospital system, donated funds play a key role in the expansion of existing programs, the purchasing of new state of the art equipment, and the support of patients and their families at Broward Health.

The Broward Health Foundation offers a wide variety of ways to support all the facilities that make up Broward Health from easy ways to give online at BrowardHealth.org, to our annual giving funds, to planned giving programs that include simple ways to include Broward Health in a will or trust.

The Broward Health Foundation staff works to support the Broward General Medical Center, North Broward Medical Center, Coral Springs Medical Center, Imperial Point Medical Center, Broward Health Weston, Gold Coast Home Health and Hospice Services, and our network of neighborhood clinics.

“The Comprehensive Cancer Center at North Broward Medical Center has helped me tremendously ever since I was diagnosed with breast cancer. They’ve provided me with physical and emotional support throughout my illness. Their diagnostic and treatment methods are the most current, and their educational programs have helped me become more knowledgeable about cancer care. Cancer is scary, but help and hope is at Broward Health.” — Djenane St. Fleur, Tamarac

BROWARD HEALTH: A HEALING HAND FOR CHILDREN

As any parent or caregiver knows, caring for a sick child extends beyond “medicine and science.” Within Broward Health’s network of children’s services, we deliver care in an environment tailored to meet the specific needs of children. Over the past 50 plus years, this has meant providing treatment as gently as possible, counseling and providing emotional support for the entire family and even arranging visits from special guests such as Santa, furry friends (pet therapy) and the Rockettes.

Broward Health’s pediatric sedation unit at Chris Evert Children’s Hospital—offering the highest level of care for newborns, infants and children—recently won the Codman Award for significant improvements in patient outcomes. The pediatric sedation unit — the only one of its kind in Broward County — is now recognized as a national best practice and has one of the most successful sedation rates in the industry.

Children’s services at Coral Springs Medical Center include a pediatric intensive care, neonatal intensive care and pediatric rehabilitation. An ER for Kids is staffed around the clock with a pediatric specialist and features a fast track program for young patients identified as “less critical.” An expansion to begin this year will include a new Pediatric Emergency Care Unit as well as more space to serve adult patients – 40 exam rooms (an increase from the current 23), four isolation rooms, and two trauma rooms.

Broward Health’s Camp KoralKids for children ages 5 to 11 years old is South Florida’s only medically supervised camp for children with diabetes.
BROWARD HEALTH LAUNCHES
COMPREHENSIVE WEB SITE

Want the latest information about breaking health news? Need to research health topics or stay in touch with loved ones during a hospital stay? BrowardHealth.org, one of the most comprehensive Web sites for health information in Broward County, can help with all of that and more.

Broward Health launched its new, enhanced Web site in September 2007 with features including an interactive parent, teen and kids section and a new health information library and CarePages – a special feature for patients. A new medical content package includes an online adult and pediatric encyclopedia with more than 12,000 topics in English and Spanish.

CarePages allow patients and families to create free, private, personalized Web pages for hospitalized family members. It’s an excellent way to provide patients with that extra support and encouragement they need from family and friends.

BrowardHealth.org will continue to improve and expand its content. We encourage you to take a few minutes and visit our site and after you do, please take a few moments to let us know what you think!

BROWARD HEALTH:
UNRIVALED IN NEUROLOGICAL CARE

In a field as serious and specialized as neurology, saying you are the best is not a claim to make lightly. For us, it’s also a promise that we give to our patients and the community. We pledge that at Broward Health, our patients will receive the best treatment available by our highly trained medical professionals within our state-of-the-art facilities using our cutting-edge technology.

Broward Health’s Neurological Institute is nationally-certified as a Primary Stroke Center and as a Comprehensive Stroke Center. It also holds the distinction of being the only facility of its kind in Broward and Palm Beach counties.

The fact that 12 percent of Certified Neuroscience Registered Nurses in the state are on the Broward Health team, is just one of the reasons to trust us.

Maria Kuhn-Brotton was at her office at the United Way in Ft. Lauderdale when, without any warning, she began to feel odd. Moments later, she passed out from a brain aneurysm, which left her in coma for 31 days. Within 20 minutes of her “brain attack,” she was undergoing brain surgery by a team of medical experts that would save her life.

And that’s just the first part of her story. Part 2 began at Broward Health’s North Broward Medical Center Rehabilitation Unit.

“I really believe if I had received rehabilitation anywhere other than North Broward, I would not have worked as hard as I did and recovered as quickly. They provided me so much support. The staff is amazing. They believe in doing whatever it takes!”

“If I had not received immediate care from my neurosurgeon and then the five brain surgeries, I don’t think that I would be alive ... I don’t remember anything but my family keeps saying how amazing everyone at Broward General was – the way they cared for my family and took the time to explain everything. They gave my husband a room to sleep in so he could stay with me.” – Maria Kuhn-Brotton, Pembroke Pines

“At 85 I had two knee replacements done. My recovery was faster than expected and I attribute that to the exceptional hospital care, its educational program and my top-notch surgeon. Without the Coral Springs Medical Center team, I wouldn’t have the opportunity to enjoy the quality of life that I do today. From the bottom of my heart I thank the entire team!”

— Bob Garbaras, Coconut Creek
THE BROWARD HEALTH PHYSICIAN GROUP

Whether our patients need care for a common cold or emergency surgery, our multi-specialty physician team is here to get our patients back in good health.

COMMUNITY HEALTH SERVICES

Understanding that access to care and healthcare costs are issues that affect us all, a strength that we are especially proud of at Broward Health is our extensive network of Community Health Services.

For more than 50 years, Broward Health has served as a safety net for the uninsured and underinsured. By providing easy access to neighborhood-based primary care centers and school-based health centers, we are able to take care of health concerns before they become emergencies.

Our primary and specialty care centers provide a complete continuum of care including prevention and education, outreach, case management, urgent care, dental care, home health care, hospice and much more. Located in more than a dozen locations, these centers primarily serve the indigent and working poor.

We’re also serving the community with our School-based Health Centers. Tailored to meet the needs of the particular student population and the surrounding neighborhood/community, these centers were established in 1994 in collaboration with the Broward County School Board.

Services include: treatment of common injuries and illnesses, obstetric/gynecological exams (Dorfield and Lauderdale centers only), health and nutritional counseling, family planning and counseling, behavioral health services and social services. There is a sliding fee scale system available for those uninsured patients who qualify for financial assistance. Cash and checks are acceptable forms of payment. Patients are seen by appointment and walk-ins are welcome.

HEALTH LINE

Our specially-trained Health Line representatives are available to help you find a physician on your health plan or answer questions you may have regarding managed care options. You may also call us to register for classes, find out about lectures or to join one of our Senior Supper Clubs.

Reach Health Line at (954) 759-7400 or healthline@browardhealth.org.

Our new name heralds a powerful new vision for healthcare in Broward County. Fully integrated. Innovative. And compassionate. We have some of the most modern facilities anywhere and we're only going to get better. The new Broward Health. A powerful new way forward. A powerful new way to provide exceptional healthcare for all of Broward County.
