Celebrating More Than 80 Years of Caring.
To provide world-class healthcare to all we serve.

To provide quality healthcare to the people we serve and support the needs of all physicians and employees.
At the core of our mission is quality, and our healthcare system continues to receive national recognition. Since July 2017, all of our hospitals have been recognized for providing high-quality care, receiving more than 25 awards from prestigious organizations, including The Joint Commission, the National Committee for Quality Assurance, the American Society of Clinical Oncology, the American Nurses Association and the Human Rights Campaign.

We continue to invest in our hospitals to meet the growing needs of our community. More than $117 million has been committed to capital improvements for women’s and children’s services, and we are continuing to develop key services that will provide greater access to high quality care for our patients. All of this has been accomplished while improving operational efficiencies that have reduced expenses by $30 million.

As we celebrate Broward Health’s 80th anniversary, we are proud of our healthcare system’s accomplishments over the past year, and look forward to continuing our mission of serving the healthcare needs of our patients and their families.

It’s been an exciting time of growth for our healthcare system. As we look to the future, we remain steadfast in our commitment to enhancing the health and well-being of our patients, and your unwavering support enables us to fulfill this important mission. Thank you for partnering with us on this journey. Working with our stakeholders, we will continue to make a difference in our community, providing compassionate, patient-centered care for generations to come.

Best regards,

Andrew Klein

2018 | Report to the Community

Celebrating More Than 80 Years of Caring.
Investing in Our Future

Broward Health continues to make capital improvements and enhance services to provide patients across Broward County with access to the highest quality of care. More than $117 million has been dedicated to system-wide women’s and children’s projects, and we will invest more than $5 million in robotics to bring the latest technology to our patients.

Broward Health Coral Springs offers a new four-story, 110,000-square-foot patient tower, which features The Maternity Place, a Level II NICU and enhanced surgical services.

Broward Health North completed a $70 million, multi-year project that included the new 36,000-square-foot Emergency Department and Trauma Center, expanded surgical services that included six new operating suites, as well as interior and exterior renovations and a new central energy plant that has increased energy efficiency.

At Broward Health Imperial Point, the hospital offers renovated medical and surgical units, Emergency Department and Wound Care Center.

The Salah Foundation Children’s Hospital at Broward Health Medical Center continues renovations to the neonatal intensive care unit, bringing state-of-the-art care to the tiniest patients. The new NICU will offer 30 Level II private rooms and 33 Level III private rooms, as well as related support space, such as physician offices, on-call rooms and family-centered areas.

Our mission to provide high-quality care to the people we serve has withstood almost a century of change and growth. Positive outcomes, a patient-centered experience and technologically-advanced care have been the driving force in keeping the vision alive. As the system welcomes the next 80 years, we aim to continue to be Broward County’s preferred choice for care.

“ Our caregivers have proudly served patients since 1938, and we look forward to meeting the healthcare needs of our community for generations to come.”

- Gino Santorio, President/CEO

As one of the 10 largest public healthcare systems in the nation, Broward Health is comprised of more than 30 locations throughout Broward County and offers a variety of healthcare services, including a Level I trauma center, an award-winning children’s hospital, comprehensive cancer care, transplant center, orthopedics, cardiovascular services, comprehensive stroke care, maternity and neonatal care, a network of community healthcare centers and much more.

With more than 1,700 affiliated physicians and 8,000 employees, the Broward Health team works together to provide high-quality, personalized care while utilizing the latest medical advancements and technology.

Below: Broward Health North’s new 36,000-square-foot Emergency Department and Trauma Center.
SERVICES INCLUDE: 24-Hour Emergency Department  Level I Trauma Center  Bariatrics  Behavioral Health  Cardiovascular Services  Comprehensive Cancer Center  Comprehensive Stroke Center  da Vinci Robotic Surgery  Diabetes Program  Graduate Medical Education Program (GME)  Inpatient Unit/Hospice  Interventional Radiology  Joint Replacement Center  Lillian S. Wells Women’s Health Center  Liver Transplant Program  Maternity Place  Neurology/Spine Services  Nuclear Medicine  Outpatient Clinic

Broward Health Medical Center in Fort Lauderdale has been a respected leader in healthcare since its founding in 1938. As the largest hospital in the Broward Health system, Broward Health Medical Center has 716 beds and is home to virtually every medical specialty, including orthopedic, behavioral health, liver transplant services, palliative care, sickle cell disease, comprehensive stroke care, a Level I trauma center, cancer and cardiac care, an on-site wellness center, bariatric surgery, as well as robotic surgery. The Medical Center received the Healthgrades Five-Star designation for cardiac and OBGYN and is certified by The Joint Commission for hip and knee replacement, as well as stroke care.

The pain in Christopher Watts’ chest wouldn’t go away. For a few months, the uncomfortable shortness of breath would linger for about 10 minutes and then subside. The 48-year-old Fort Lauderdale resident was admitted to Broward Health Medical Center with acute myocardial infarction and underwent a complicated open heart surgery.

Watts made a full recovery and is grateful for the compassionate, extraordinary care he received at Broward Health Medical Center, which is designated as an Aetna Institute of Quality Cardiac Care Facility.

“I experienced an unconditional love from the staff, the kind you receive from your mom,” Watts said. “You can’t train someone to give that kind of care. It’s innate, it’s in your DNA. I really felt protected. I couldn’t ask for anything more.”
Ben was just 1 month old when he began showing symptoms of a cold. His parents, David and Nicole Kruse, managed his symptoms. However, things took a turn for the worse - Ben’s condition intensified, he began to vomit and his breathing failed.

Ben was rushed to the Emergency Department at Salah Foundation Children’s Hospital at Broward Health Coral Springs, a 2018 Healthgrades Patient Safety Excellence Award winner. His oxygen levels had dropped down to 70 percent and X-rays confirmed fluid in his lungs and signs of pneumonia. Ben was transferred to Salah Foundation Children’s Hospital at Broward Health Medical Center, where he was diagnosed with H influenza type b and placed in the oscillator to help improve his breathing.

After three more weeks of treatment, Ben was fully recovered and on his way home. “Ben is doing great now,” said Nicole. “I am thankful to Broward Health for caring for our family.”

Since opening its doors in 1938, Broward Health has been providing pediatric services to the communities we serve. In 1996, pediatric services were enhanced and a full-service children’s hospital was established to provide newborns, children and adolescents with the most advanced, family-centered care. Today, the newly renovated and expanded Salah Foundation Children’s Hospital is proud to offer services, across two campuses, to meet the needs of the community.

Ben Kruse | Pediatric Intensive Care Patient

Ben was rushed to the Emergency Department at Salah Foundation Children’s Hospital at Broward Health Coral Springs, a 2018 Healthgrades Patient Safety Excellence Award winner. His oxygen levels had dropped down to 70 percent and X-rays confirmed fluid in his lungs and signs of pneumonia. Celebrating More Than 80 Years of Caring.
Broward Health Coral Springs is a 250-bed hospital that includes the Salah Foundation Children’s Hospital, women’s services and surgical services, as well as a pediatric and adult Emergency Department. The hospital offers the only pediatric intensive care unit in northern Broward County. Certified by Blue Cross Blue Shield as a Blue Distinction Center for Maternity Care, the hospital recently invested more than $65 million to build a four-story patient tower to include 56 private rooms for women’s services, robotic and general surgical services, maternity care and an advanced Level II neonatal intensive care unit. The hospital also provides an expansive community education program that includes a specialty summer camp for children with diabetes.

Angel Gonzalez

Angel Gonzalez was driving near Broward Health Coral Springs when he felt discomfort in his chest. He pulled into the hospital’s parking lot, feeling dizzy and nauseated, and stumbled toward the Emergency Department clutching his chest. Gonzalez barely made it through the ER’s sliding glass doors when he spotted a nurse waiting to help him. He had suffered a massive heart attack and was transferred to Broward Health North, where he underwent triple bypass surgery. He still gets teary-eyed when he describes his gratitude for the caregivers who saved his life that day.

Every year, Gonzalez and his daughter, Nicole, visit the ER at Broward Health Coral Springs on the anniversary of his heart attack to thank the team that came to his rescue.

“When I first opened my eyes in the hospital, I felt like I had been reborn. They gave me the best gift I could ever have. They saved my life.”

SERVICES INCLUDE:

24-Hour Adult & Pediatric Emergency Department
Adult & Pediatric Sleep Disorders Center
Broward Health Complete Pharmacy
Cardiac Services
Center for Wound Care

Critical Care Services
Inpatient/Outpatient Medical Services
Joint Replacement Program
Neurology Evaluations
Primary Stroke Center
Radiology Services
Rehabilitation Services
Respiratory/Airway Function Test Services
Salah Foundation Children’s Hospital
Surgical Services

When I first opened my eyes in the hospital, I felt like I had been reborn. They gave me the best gift I could ever have. They saved my life.”
I was treated like a king –
My family life went from a five to 100, but I had to commit 100 percent.

Perry Rocco Lucanese | Bariatric Patient

Perry Rocco Lucanese, 44, had always been an athletic man. Between playing sports and regularly attending the gym, the electrician and father of six was active. But after several injuries, Lucanese was left with limited mobility, and eventually, a very sedentary lifestyle.

His weight increased to 290 pounds and Lucanese hit rock bottom. His blood sugar, cholesterol and blood pressure were affected, and he suffered from sleep apnea. He needed assistance showering and getting dressed. Anything that required bending over was almost impossible for him.

In January 2018, Lucanese underwent bariatric surgery at Broward Health Imperial Point. The next day he was home and working hard to turn his life around. Almost nine months later, Lucanese has lost 75 pounds and is still losing weight.

“I was treated like a king.” Lucanese said. “My family life went from a five to 100, but I had to commit 100 percent.”
Broward Health North is an award-winning, 409-bed hospital featuring state-of-the-art technology and compassionate care. The hospital offers a new Emergency Department with 53 private rooms and three dedicated trauma bays, as well as sophisticated services, including spine and cardiac care, an inpatient rehabilitation unit, comprehensive stroke care, memory disorder center, orthopedic and sports medicine, and an adult Level II trauma center. Broward Health North was recognized by U.S. News & World Report as a high-performing hospital for hip replacement, and was voted “Best Emergency Room” by Our City Magazine Reader’s Choice Award.

Buthler Julien was home watching sports when he started to have a stroke. He tried to stand up, but his right leg did not respond and he fell down. Luckily his girlfriend Evelyn Galarza, a registered nurse at Broward Health Medical Center, recognized the signs and called 9-1-1. The emergency medical team bypassed area hospitals to bring Julien to Broward Health North’s Emergency Department, because it is an AHCA certified comprehensive stroke center that offers advanced care for stroke.

Julien underwent a successful mechanical thrombectomy procedure and after being stabilized, was transferred to Broward Health North’s inpatient rehabilitation unit, where he worked with a multidisciplinary team of physical, occupational and speech therapists to regain control of his movements.

Through perseverance and a positive attitude, Julien is independent and can walk unassisted. “Broward Health saved my life,” he said.
Broward Health Community Health Services is a Joint Commission accredited network of 10 community health centers that form a medical home for residents in the northern two thirds of Broward County. With health promotion programs such as care coordination, emergency room diversion, Kinship Care Initiative, senior-focused classes and primary care for the homeless, HIV-positive and local indigent population, Broward Health continues to be a leader in provision of primary care in Broward County. Broward Health Community Health Outreach Services touched 35,376 lives during its participation in 324 events on and off campus, while successfully completing the Ryan White survey this year.

SERVICES INCLUDE:

- Adult Primary Care
- Behavioral Health
- Community Outreach Services
- Dental Care
- Healthy Family
- Healthy Start
- Health Insurance Marketplace Enrollment
- HIV/AIDS Care
- Immunizations
- Medical Enrollment Services
- Medical Options for Patient Eligibility Department (M.O.P.E.D.)
- Kinship Care Initiative Laboratory Services
- Linkage to Primary Care
- Nutritional Counseling
- Nurse Family Partnership Outreach Services
- Pediatric Care
- Prenatal Care
- Social Services
- Urgent Care
- X-Ray

Broward Health Urgent Care

Broward Health Urgent Care has three locations that treat non-life threatening illnesses, provide physicals and offer X-rays, screenings, immunizations and vision testing. Serving nearly 22,000 people last year, the centers work hand-in-hand with other Broward Health hospitals should a patient require a higher level of care, making the transition to another facility as seamless as possible.

Children’s Diagnostic & Treatment Center (CDTC) serves nearly 12,000 infants, children, youth and women annually. CDTC provides medical care, case management, social services and other types of intervention to children, adolescents and young adults with chronic illnesses and developmental disabilities, as well as support and education to their families. CDTC is also active in research, participating in numerous clinical trials for HIV/AIDS.

In 2017, CDTC earned national recognition as a Level III Patient Centered Medical Home from the National Committee for Quality Assurance. The Center’s Medical Home Model puts patients at the forefront and builds better relationships between families and their care teams to give kids the best health possible.

SERVICES INCLUDE:

- 24/7 On-Call Service
- Developmental Assessments
- Early Intervention Services for Infants and Toddlers
- Health Education
- HIV “Test & Treat” and Specialty Care
- Lab Services
- Medical Social Work
- Medication Counseling
- Mental Health Assessments and Counseling
- Neuropsychological Assessment and Follow-up
- Nurse Telephone Triage Service
- Outreach and Service Referral for HIV-Infected Pediatric/Adolescent Primary Care Clinic and Dental Clinic
- Prenatal Care Linkage and Resources for Broward County Pregnant Women
- Support Groups
Community Outreach

Broward Health participates in a variety of outreach programs to promote access to care and healthy living. From immunizations to HIV tests to community education, Broward Health is committed to supporting the community and investing in its health and well-being through events and education offered year round.

Mobilize to Immunize

Broward Health Community Health Services administered 305 vaccines to 150 children during its Mobilize to Immunize Summer Health Fair series. Immunizations help protect children in the community and meet vaccination school requirements.

CDTC Holiday Toy Event

Children’s Diagnostic & Treatment Center held its annual toy drive for children with special healthcare needs. In December 2017 holiday gifts were provided for 3,000 CDTC clients and their siblings.

HIV Testing

Broward Health Community Health Services provided 10,893 HIV tests from June 2017 through May 2018. HIV testing outreach, which provided HIV counseling and testing, was funded in part by two grants from the Centers for Disease Control and Prevention.

Mobile Health Unit

The Man Van, recently renamed Broward Health On-the-Go, impacted more than 85,000 people by participating in 48 community events, such as health fairs, parades, festivals and marathons. The mobile unit offered a variety of health screenings, from full blood work to free basic health screenings and HIV tests.

Stop the Bleed

Broward Health joined the nationwide Stop the Bleed initiative, providing classes that offered hands-on training to help prepare the community to control active bleeding in emergency situations. Uncontrolled bleeding is the number one cause of preventable death from trauma. The classes focused on how to recognize a life-threatening active bleed and apply a tourniquet or direct pressure to control bleeding.

“Taking steps to safeguard our children’s health against preventable diseases improves the overall health status of the entire community, and it’s always rewarding.” - Sandra Elliot, M.D., Pediatrician

The Broward Health Physician Group is a multi-specialty consortium of highly skilled physicians serving the healthcare needs of the residents of Broward County, Florida, and the surrounding area. The mission of the Broward Health Physician Group is to provide world-class healthcare in a compassionate, collaborative and multi-disciplinary environment.

With more than 70 physicians located throughout the county, Broward Health Physician Group continues to grow to meet the needs of the community.

Graduate Medical Education

Broward Health has a robust and well-established Graduate Medical Education program that includes seven residency and two fellowship programs. Broward Health Medical Center has been designated a statutory teaching hospital since 2014.

With 139 residents and fellows, Broward Health trains tomorrow's physicians in internal medicine, family medicine, pediatrics, dermatology, orthopedic surgery, oral maxillofacial surgery, transitional year residencies and cardiology, as well as hospice and palliative medicine fellowships. Currently affiliated with Nova Southeastern University, Florida International University and University of Miami, Broward Health hosts medical students within Broward Health Medical Center for third and fourth year rotations. Many of our residents go on to various fellowships nationwide.

Broward Health currently has 140 research studies, including pharmaceutical clinical trials, cooperative studies, humanitarian device exemptions and investigator initiated studies. Within Graduate Medical Education, residents and fellows participate in approximately 50 active research studies, with 20 currently in review. Current research projects include a federally-funded sickle cell disease study on patient follow up for transcranial doppler screening, age appropriate education to assist pediatric asthma patients in disease self-management, patient outcomes in cardiovascular disease and atrial fibrillation, as well as a study to understand long-term quality of life outcomes for pre-term births that resulted in a stay in the Neonatal Intensive Care Unit.

Broward Health International

Entering a foreign country can be overwhelming, especially when medical attention is needed. Broward Health International understands the world healthcare marketplace, providing care annually to patients from more than 100 countries. Because of this knowledge and experience, Broward Health International has the resources needed to provide patients with world-class care during their stay at Broward Health and continuity of care once they return home.

Broward Health International offers a concierge approach to put patients’ minds at ease. Multilingual and culturally diverse concierge specialists assist with scheduling appointments, coordinating physician and hospital visits and travel planning, all while welcoming patients’ families and travel companions.
On February 14, 2018, Broward Health was notified that a mass shooting had occurred at Marjory Stoneman Douglas High School in Parkland, Florida. By late afternoon, 17 patients had been transported to Broward Health North and Broward Health Medical Center. Emergency and trauma care providers sprang into action to save lives and today continue to foster relationships with victims. Realizing the toll this event had on staff, Broward Health leadership activated the Employee Assistance Program, brought in therapy dogs and offered counseling to all those affected.

To help employees and the community continue to heal from the tragedy, the Broward Health Foundation repurposed its annual employee campaign to raise funds for victims of the shooting. In total $112,356 was raised by Broward Health employees and the community. The funds are being donated to Parkland Cares, an organization that helps connect people affected by the incident with long-term counseling resources.

Broward Health hospitals also became involved in community events, including yoga workshops and Stop the Bleed classes. Meant to help heal and empower those affected – as well as the greater community – physicians, nurses and staff found comfort in working with the public and intend to continue outreach efforts throughout the coming year.

As time passes, we as a system will never forget the lives lost, the lives saved and all those affected. We will forever be MSD Strong.

Grants
Broward Health relies on grants to implement programming and research across the system. Broward Health was awarded more than $12.4 million in grant funding in fiscal year 2018. These private, federal, state and local grants enabled Broward Health to increase access to quality care to all those we served.

- St. Baldrick’s Foundation provided an INFRASTRUCTURE GRANT to assist the Salah Foundation Children’s Hospital in opening new clinical trials for pediatric oncology.
- Florida Society for Clinical Oncology (FLASCO) provided a GRANT to cover utility payments for indigent patients receiving cancer treatment.
- $2.6 MILLION in Ryan White Grants was provided for persons with HIV as payer of last resort.
- $2.6 MILLION in funding to provide care for homeless populations.
- $1.1 MILLION in no cost pharmaceuticals for the uninsured population.
- $207,000+ in funding to support investigator-initiated research projects.

Bonds
In 2017, Broward Health successfully sold $317 million of tax-exempt Revenue Bonds, Series 2017B. The bonds were fully subscribed within five hours of being made available to retail and institutional investors. The proceeds are being used to fund capital investments into signature projects, such as the expansion of the Salah Foundation Children’s Hospital, as well as to mitigate the risk to Broward Health’s balance sheet by refinancing variable debt with long-term, fixed-rate borrowing and enhance the system’s unrestricted cash balances.

1.1% decrease in operating margin 15% decrease in operating loss $33 million reduction in operating expenses

Quality is at the core of our mission. Our hospitals have been recognized for providing award-winning high-quality care. Since July 2017, Broward Health has received more than 25 awards from prestigious organizations, including The Joint Commission, the National Committee for Quality Assurance, the American Society of Clinical Oncology, the American Nurses Association and the Human Rights Campaign. All four hospitals and all community health centers achieved successful Triennial Joint Commission Accreditation.
