(Date: Jan-Dec, 2019)
STROKE PROGRAM QUALITY & OUTCOMES

Door to Groin Puncture within 90 Minutes

Percentage of patients with acute ischemic stroke who receive mechanical treatment to remove the clot for whom access to the artery of the brain was achieved in < 90 minutes after hospital arrival.

Benchmark: American Stroke Association, Get With The Guidelines (Date: Jan-Dec, 2019)

Higher is Better = More patients treated!!
STROKE PROGRAM QUALITY & OUTCOMES

Stroke Mortality Rate

Stroke Mortality Rate is the percentage of stroke patients whose death occurs within 30 days of admission to the hospital. If the death occurs past 30 days, but the patient has not been discharged, it is also counted.

Benchmark: Crimson Cohort, expected for Stroke Mortality (Date: Jan-Dec, 2019)

Lower is Better = More positive patient outcomes!!
